

Dear Sirs,

I am a loyal XM Satellite radio listener. It has come to my attention that there is a petition seeking to block XM from offering local services such as traffic and weather. I find this to be very disturbing and strongly encourage you to reject NAB petition 04-160. I am 37 years old and an avid music fan. XM has been dream come true for me, allowing me to hear new music that I wouldn't have heard elsewhere (and I worked in music retail for 15 years so I heard alot). I was never a big fan of Boston radio, but now, I listen to XM at home and in my car. I turn to it for news, music local weather and everything that I need.

Please reject the petition.

Sincerely,

Jeff Weinstein
